At a Glance 2020

About Children's National Hospital

Children's National Hospital, based in Washington, D.C., celebrates 150 years of pediatric care, research and commitment to community. Volunteers opened the hospital in 1870 with 12 beds to care for Civil War orphans. Today, 150 years stronger, it is among the nation's top 10 children's hospitals. It is ranked No. 1 for newborn care for the fourth straight year and ranked in all specialties evaluated by U.S. News & World Report. Children's National is transforming pediatric medicine for all children. In 2020, construction will be complete on the Children's National Research & Innovation Campus, the first in the nation dedicated to pediatric research. Children's National has been designated twice as a Magnet® hospital, demonstrating the highest standards of nursing and patient care delivery. This pediatric academic health system offers expert care through a convenient, community-based primary care network and specialty outpatient centers in the Washington, D.C., metropolitan area, including the Maryland and Northern Virginia suburbs. Children's National is home to the Children's National Research Institute and Sheikh Zayed Institute for Pediatric Surgical Innovation and is the nation's seventh-highest NIH-funded children's hospital. It is recognized for its expertise and innovation in pediatric care and as a strong voice for children through advocacy at the local, regional and national levels.

Components of Children's National

- Children's National Hospital features:
 - A 323-bed acute care hospital
 - A Level I pediatric trauma center, serving three states
 - A critical care transport program via ambulance, helicopter and fixed-wing airplane
- Eight outpatient centers that provide specialty care around the region; plus, an Ambulatory Surgery Center in Maryland, with new locations opening in Virginia and Maryland in 2020.
- A Level I Children's Surgery Center designated by the American College of Surgeons Children's Surgery Verification Program. The only pediatric hospital in the region, and one of only 21 children's hospitals in the nation to achieve this distinction.
- Pediatric Specialists of Virginia, a joint physician practice with Inova Health System to enhance access to specialty care for children in Northern Virginia.
- A primary care network that includes 18 practices in Maryland and the District of Columbia, with new locations opening in 2020.
- Children's National Research Institute (CNRI), a leader in basic and clinical research programs. Children's National Research & Innovation Campus, opening in 2020, will be a one-of-a-kind pediatric research and innovation hub, anchored by our Center for Genetic Medicine Research and our Rare Disease Institute, and featuring JLABS @ Washington DC - a collaboration with Johnson&Johnson Innovation LLC.
- Two large emergency departments, located at the main campus and on the United Medical Center campus. Children's National physicians also provide pediatric emergency care in Doctors Community Hospital's Emergency Department in Prince George's County, Maryland.
- Community-focused programs and partnerships, including school health services, mobile health services and safety initiatives.

Research

More than 70% of Children’s research funding comes from federal agencies, including 60% from the National Institutes of Health (NIH). Children’s is ranked seventh in the country for NIH pediatric funding.

Children’s National researchers are investigating a multitude of pediatric diseases and novel treatments through our Institutes, Centers and Offices:

- Center for Cancer and Immunology
- Center for Genetic Medicine Research
- Center for Neuroscience Research
- Center for Translational Sciences
- Clinical and Translational Science Institute at Children’s National
- Sheikh Zayed Institute for Pediatric Surgical Innovation
- Academic Affairs
- Medical Education

Education

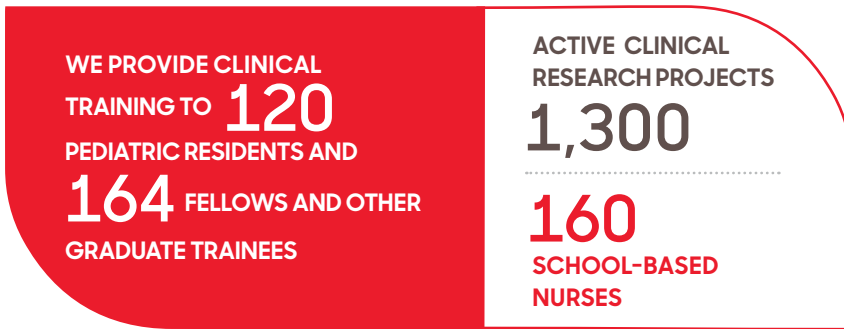

Each year, pediatric training is provided for approximately 232 third-year medical students from George Washington University (GW), 118 third-year medical students from Howard University and 250 fourth-year students from GW and other medical schools.

Advocacy and Community

Safe Kids Worldwide, launched by Children’s National in 1987, works to prevent accidental childhood injury, the leading cause of death in children 14 years and younger, through a global network of organizations. Our local coalition, Safe Kids District of Columbia, performed a total of 561 car seat inspections in fiscal year 2019.

The Child Health Advocacy Institute (CHAI), launched in 2007, focuses on child-centered policies and works to address community health needs including mental health and health literacy. In partnership with community organizations, government agencies and individuals, Children’s National supported over 131 programs and activities in fiscal year 2018, providing more than \$123 million in community benefit.

Children’s School Services (CSS) provides the operational oversight and management of school nursing services in the District of Columbia Public Schools (DCPS) and DC Public Charter Schools (DCPCS), with oversight from the District of Columbia Department of Health. The 160 school-based nurses and 18 student health techs in the CSS program had more than 560,219 health encounters with Washington, D.C., public and charter school students during the 2018–2019 school year.
